DION STACEY SELLAR

SOFTWARE ENGINEERING UNDERGRADUATE

PROFESSIONAL PROFILE

Motivated Software Engineering undergraduate with a strong interest in artificial intelligence, full-stack development and practical problem solving. Experienced in building academic and personal software projects using Python, JavaScript, React, databases and local AI tools. Eager to develop industry experience through internships and collaborative technology projects.

EDUCATION

BSc Software Engineering 2026 - 2029 (Expected)

NSBM Green University | Degree awarded by University of Plymouth

G.C.E. Advanced Level - Commerce Stream

St. Michael's College, Batticaloa | Business Studies (S), ICT (S), Accounting (W)

PROJECTS

JARVIS - AI Voice Assistant

- Built a Python-based personal AI assistant with speech recognition and text-to-speech interaction.
- Integrated local AI models using Ollama and implemented custom voice-driven commands.

Professional Portfolio Website

- Designed and developed a responsive personal portfolio using React, Vite, HTML, CSS and JavaScript.
- Created to showcase projects, technical skills and future professional achievements.

AI-Powered Smart Tourism Planner for Sri Lanka

- University AI project exploring personalized travel planning based on user preferences, budget and changing travel conditions.
- Focused on practical AI concepts and improving the visitor experience in Sri Lanka.

CAREER OBJECTIVE

Currently seeking internship, trainee and project opportunities where I can apply my software engineering knowledge, strengthen my development skills and gain practical industry experience.

ADDITIONAL INFORMATION

- No professional work experience yet; actively building experience through university and personal projects.
